

# SAVE THE DATE: 25 July 2015

## CAMPAIGN LAUNCH FOR WORLD HEPATITIS DAY

### Hepatitis B & liver cancer

### Breaking the cycle with Vietnamese men in South Western Sydney

**Saturday 25 July 2015**

**10.00am – 12.00pm**

**Light refreshments**

**Vietnamese Community Cultural Centre**

**6-8 Bibbys Place**

**Bonnyrigg**

**Hepatitis B does not discriminate between males and females.** Everyone should get a hepatitis B test. However, in South Western Sydney men are getting tested for hepatitis B at lower rates than females. Many do not understand that hepatitis B may lead to liver cancer.

This new campaign is a call out to all *Vietnamese males* in South Western Sydney to have a hepatitis B test TODAY!

Come join us to launch this important campaign, and break the cycle between hepatitis B and liver cancer.

To RSVP contact Nidia Raya Martinez, Senior Project Officer, NSW Multicultural Health Communication Service on: [nidia.rayamartinez@sesiahs.health.nsw.gov.au](mailto:nidia.rayamartinez@sesiahs.health.nsw.gov.au) or **8753 5048** by **Friday 17 July 2015**.

Males are three times more likely than females to develop liver cancer. 80% of primary liver cancers are due to hepatitis B or C.
