

- Today is a very exciting day for all of us! Thank you for coming forward and getting vaccinated. It's because of you that we have reached our first major milestone and its why NSW is leading the nation out of this pandemic.
- NSW has now reached 90.3% single dose and 73.5% double dose vaccinations.
- There are several ways you can get proof of your COVID-19 vaccinations, depend-ing on your situation. Find out more at <https://www.nsw.gov.au/covid-19/vaccination/proof>
- We will see increased case numbers, but we have invested significant amounts in our health system and our state is poised and ready.
- There were 498 locally acquired cases of COVID-19 in the 24 hours to 8pm last night. Sadly, 8 people have died.
- As we reopen it is really important that people keep coming forward for testing, even if you have mild symptoms. There are more than 500 COVID-19 testing loca-tions across NSW.
- If you do get COVID-19 please make sure you seek medical care when you need it.
- Please note that there are still restrictions in place. Make sure you know the rules in your area <https://www.nsw.gov.au/covid-19/rules>
- There are still going to be challenges. Please treat each other with kindness and respect, take personal responsibility and let's all make sure we look out for each other.
