

- NSW has now reached 84.1% single dose and 56.6% double dose vaccinations. A third of 12-15 year olds have received a first dose. This is fantastic.
- Please book in for your vaccination as soon as possible at nsw.gov.au
- There were 1,043 locally acquired cases of COVID-19 in the 24 hours to 8pm last night. Very sadly eleven more people have died.
- Thank you to the entire network of health staff who are working hard across the system and to community leaders for getting involved and supporting the community.
- It is really important that we continue to act cautiously and responsibly to drive down COVID infections and prevent lots of people ending up in hospital.
- We are concerned about positive sewage detection in the Lightning Ridge, Jindabyne Crookwell and South Lismore areas. Please come forward and get tested, even for minor symptoms.
- Vaccination is our way out of this pandemic. It safe and effective. It will protect you, your loved ones, your workmates, your friends and all of the people you come into contact with.
